

INTRODUCING OUR RANGE OF DANFOSS BALL VALVES

We've dug deep & found another great product, this time to complement our [motorised ball valve range](#). We are very pleased to introduce the [Danfoss AMZ range of isolation valves](#).

Available in 230v, 24v & in sizes DN15 - DN25, these valves for use as zone isolation in 2 port or as full diverting valves in 3 port configuration. They have high flow rates, low pressure drops & sold [complete as pre-assembled valve & actuator combinations](#).

The ON / OFF zone valve type AMZ 112 & AMZ 113 are typically used in conjunction with :-

- * Domestic & commercial central heating applications
- * Domestic hot water applications
- * Solar energy plants
- * Priority control of hot water supply & heating (Diverting Function)
- * Priority control of boiler & solid fuel installations (Diverting Function)

Please feel free to give us a call or [E - Mail](#) us for more information on these great little valves.
