

# H&C HEAT AND COMBUSTION

## PRICE CHANGES

### H1382P

Unfortunately the manufacturer of the H1382P series of water differential pressure switches have increase their costs. This is the first time in over 2 years this series has had a price change. We have had no other choice than to pass the increase onto the sale price for the product. As always, your portal price already reflects this change.

We are very pleased to confirm that this is the only line from Bailey & Mackey that has an increase in cost. As **Live Price Portal** account holders you will get the most up - to - date prices, information, notifications, offers and news items. If you have not already done so, feel free to register for a **Portal Account**, it only takes a second and best of all ..... it's FREE !!!
