

# H&C HEAT AND COMBUSTION

## SURCHARGE FOR SHIPPING COMPRESSED GAS CANISTERS

Unfortunately all couriers have increased their charges for shipping our compressed test gas canisters

Unfortunately we will have no other option than to pass this surcharge on. This is a result of C.A.A. tightening the rules on transportation on "Dangerous Goods". These rules are applied to every courier in the U.K. unless they have a licence to carry dangerous goods. The legislation has come from the Civil Aviation Authority (CAA), Department for Transport (DfT) and the Maritime and Coastguard Agency (MCA).

Gases - (including flammable, non-flammable, toxic and compressed gases, gas cylinders for camping stoves, butane, ethane, refills for lighters, fire extinguishers and scuba tanks; also see Aerosols and Lighters)

UK destinations: **No**

International destinations: **No**

Because of new legislations, we are now unable to send these canisters out by "normal carriers" as they have now been classed as "hazardous products", therefore the only way these can be sent out is by a registered courier, who by law, are able to collect and deliver such products. The net result of this is the specialised courier can pick up and deliver to you but the carriage charge for this service varies in price depending on weight and post code of delivery point

To keep the cost of the products to our usually low prices, If you require **Test Gas Canisters**, please contact the office for a quote with regards to the specialized carriage charge. Unfortunately delivery would be a minimum of 3 - 4 working days from date of order.
